## **'70-'81 F-BODY A/C DELETE PANEL**

Thonotosassa, FL – The second generation F-Body makes a perfect street car or race car and their popularity is making a comeback. 70's A/C units were large, heavy and ugly, protruding significantly into the engine bay. Race cars don't need air conditioning and today's street cars have the option of running a one-piece under dash unit so removing the cumbersome firewall mounted unit is quickly becoming the norm. BMR's new A/C delete panel for the Second Generation F-Body is an easy solution to the large hole left in the firewall once the A/C has been removed. BMR makes their A/C delete panels from 1/8" aluminum to keep the product lightweight without being flexible. Patterned after the OE A/C box and precision laser cut to bolt on using existing mounting holes.

### **Part# FP002**
