

FOR IMMEDIATE RELEASE

BMR Fabrication Strut Tower Brace for the Pontiac G8

Eliminate tower deflection and improve handling in your new Pontiac G8 with a Strut Tower Brace from BMR Fabrication. These braces are constructed from 1-1/4" diameter x .120 wall DOM steel and 3/16" CNC laser cut steel plates. The Strut Tower Brace (STB0012) uses existing holes to mount in the engine bay, so there is no need to remove the struts or make any permanent modifications to the car during installation. This is truly a bolt-in piece. These strut tower braces are formed to the contours of the covers in the G8 engine bay for enhanced cosmetic appeal. Available in black hammertone or red powdercoat finishes.
