

FOR IMMEDIATE RELEASE

BMR Fabrication Lower Control Arms for the 4th Generation F-Body

Eliminate wheel hop and add adjustability in your 4th Gen F-Body with a set of Lower Control Arms from BMR Fabrication. These Lower Control Arms feature on-car adjustability, polyurethane bushings on one side, and a rod end on the other side. They are manufactured from heavy wall 1.5" DOM steel tubing and assembled with CNC machined ¾" chrome moly double adjusters. The BMR On-Car Adjustable Lower Control Arms (TCA004) utilize an internally fluted, greaseable, low-deflection polyurethane bushing on one side and a heavy duty chrome moly ¾" XR series QA1 rod end on the other side. This design allows bind-free rear end articulation without compromising sound or ride quality while also allowing on-car length adjustability. Installation time is only 1 hour. Available in black hammertone or red powdercoat.
